

Bhavishya India Website Description

Bhavishya India logo

In the starting page,

We want to show the registration page i.e sign up after that the home page will be shown to the user as want everyone to register first.

Sign up Details:

Full Name – text box

Email – optional*

Contact No. – Verification with an OTP

These are some basic details that we want in our home page.

Please refer to the below image and let us know if anything else we can add in home page.

Moving further we want following tabs -

1. **Course Tab**– When the user hover on it then shows board CBSE, ICSE, UP, MUSIC. When user hover on CBSE, ICSE OR UP board then shows Class 6 to class 12 vertically.
2. **1 – on – 1 class** – Show same as course tab.
3. **Find your teacher** – When user click on it we want to go to a web page where top portion will be same as home page. Then we want to provide 3 search box to search teacher by name, by subject and by class. Then below of page we want to show some profile of teachers with demo videos. Please let us know if anything else we can show in this page. free study material at the bottom of the page.
4. **Demo Video** – When users click on it, a page opened where student can select the **board**→ **class**→ **subjects**→ **teacher's profile**→ **watch video**→ . We want to let student watch demo video, After the end will be stopped and a **pop-up** will appear to take a subscriptions.
5. **Free Study Material** – Here we want to provide following in option when anyone hover on this tab.
 - a **NCERT Solution**→ **board**→ **class 6-12**
 - b Last 10 years question **paper**→**board**→ **class 10 and 12th**
 - c **Syllabus**→ **board**→ **class 10 & 12**
 - d **Sample Paper**→ **board** **class 6-12**

Please check if we can provide an NCERT solution for any board, any class and any subject in one page, Same for other options

6. About us:
7. Contact us

Moving further we want a slide show where we want to show following options.

1. Enroll Now – This tab will take student on the **subscription page**.

Subscription Page –

In this page first a popup will appear where we need below details –

Board-

Class-

Sub- This should be multi select where student can select multiple subject

Submit

When student submits a page will come where available demo videos of that class and board that is provided by student will be shown to student. And videos should be categorized by subject. We have also some teacher who will teach multiple subjects, let's suppose there is a teacher who is teaching all subject of class 6 in one video and there is a teacher who is teaching two subjects say English and Math so we want a categorization in that way also. Please refer attached sheet to get knowledge of this. We have divided subscription into different type, see in this sheet. We are doing this so that student can take subscription according to teachers.

There we want to show the text “Please watch the free videos and subscribe to teacher of your wish.” Then below are the videos and in each video we want a enroll option through which student can directly go to the main subscription page. Also if student click on teacher profile a demo video will be shown to student and after complete of it student will directly go to main subscription page.

Main subscription page –

This page will come as per student response on previous page so we already know the type of subscription and fees are mentioned in attached sheet. We want to let them know the package that student want to get, there is monthly, quarterly, half yearly and yearly subscription. Please refer attached sheet for the same.

Payment gateway can be through upi of paytm, google pay, phone pay or through debit and credit card.

We will send you the updated subscription sheet if any.

2. **Live class** – If student has subscription clicking on this will redirect to play store to download the app. If not then provide a **pop-up** to ask for **subscription**.
3. **Previous Class** – We want to provide an option where a student(who already have a subscription) can watch the previous live video, if he/she missed to attend the **live class**. Here also redirect to playstore to download the app
For a new user who didn't buy a subscription yet shows them a **enroll subscription page**.

Course tab – When anyone click on class 6 under course tab. We want below page to appear

Here is the look that we want in our course tab, we try to provide all subjects of that class in one page only as you can see in the above snapshot. Also with the subject we are providing the demo videos available.

Here are categories of subject class wise.

1. **Class 6 to 8** – Subjects will be Math, Science, Hindi, English, Computer, Social Science
2. **Class 9 & 10** - Subjects→Maths, Science(physics,chemistry,biology), English, Computer, Social Science, Hindi
3. **Class 11 to 12 (Science)** – Maths, Physics, Chemistry, Biology, English, Computer.

Solution material, mock test, previous year question paper should be pdf downloadable. Watch video is for demo video which is already discussed above

1-on-1 class – We want same categorization here as the course tab. here we want our own teachers profile shown in the page who will give one on one classes with open audio and video from both sides.
